

# Reconcile & Report by Sub-Level

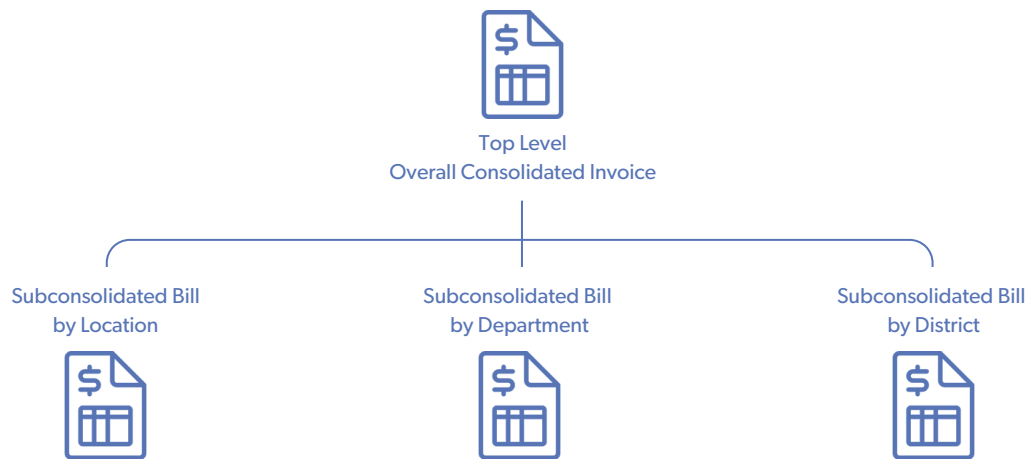

Simplify Premium Bill Administration with Powerful Multi-Entity Billing Tools

## Group Bill Reconciliation

AdminaHealth provides the tools that support the billing administration for multi-entity plans, such as those of school districts, car dealerships, hotel chains, government agencies, unions, and businesses with multiple EINs, to help each member reconcile their employee activity (i.e., enrollment changes and premium adjustments) and roll up all entities to produce a consolidated invoice for the parent company.

## Group Bill Consolidation

After reconciliation, you can produce a consolidated invoice showing a summary page of the total amount of benefit premium due that month, including subsequent pages showing the break-downs with totals by Location, Vendor, Benefit, Coverage, all Actives, Adjustments, and Expected Adjustments.

### *Reconciled enrollment data includes:*

- Employees Covered
- Coverage Period
- Locations/Departments/Divisions
- Vendors & Plans
- Plan Rates by Coverage Tiers
- Employee % Contribution
- Enrollment Counts
- Total Premium
